1. Introduction

1.1. Purpose

This Environmental policy establishes the guidelines and regulations that govern Arise Group's commitment to reducing its environmental impact and promoting sustainable practices in all aspects of its operations. It applies to all employees, who share the responsibility of upholding its principles.

The policy aims to guide and encourage representatives of Arise Group to adopt and support sustainable practices in their daily activities, thereby contributing to the organisation's overall environmental principles.

1.2. Definitions

Arise Group - Arise AB (publ) and its subsidiaries

Employee - All employees, board members, consultants, sub-consultants or others who work for or represent Arise Group

Policy - This Environmental policy

1.3. Guiding Principles

Grounded in the United Nations Global Compact's environmental principles, the OECD Guidelines for Multinational Enterprises, and the 2030 Agenda with its 17 Sustainable Development Goals, our primary objective is to minimise environmental risks and impacts associated with our business activities.

2. Policy Statement

Arise Group's mission is to deliver clean energy in a way that creates value and inspires lasting positive change for our planet, fosters environmental stewardship and empowers local communities. We are dedicated to delivering scalable renewable energy solutions, driving the essential transition from fossil fuels to clean energy sources.

3. Our Commitment

We prioritise environmental responsibility in our operations and strive to support the sustainable development of renewable energy. Through systematic collaboration, Arise Group is dedicated to accelerating the global transition to renewable energy while considering the environment.

We work to ensure our activities have a positive environmental impact and consider long-term sustainable development. This includes, but is not limited to, careful material choices, efficient resource and energy use, protection of biodiversity, as well as reducing waste, pollution, and greenhouse gas emissions.

We aim for continuous improvement in our environmental practices, balancing technical feasibility, economic considerations, and environmental factors. In collaboration with suppliers, authorities, and other stakeholders, we align our decisions with international environmental goals.

3.1. Principles

Arise Group commits to:

- contributing to increased amounts of renewable energy within the energy system;
- managing facilities in accordance with applicable laws, regulations, standards, and permits in consultation with authorities;
- applying the precautionary principle by avoiding harmful materials and methods when suitable alternatives are available;
- systematically identifying and preventing environmental risks and accidents;
- promoting efficient energy and resource use throughout the value chain;
- continuously striving for improvements in our operations;
- regularly measuring, setting targets, and transparently communicating our environmental performance; and
- reducing greenhouse gas emissions in accordance with the Paris Agreement's guidelines to limit global warming to 1.5 degrees Celcius.
