

PRESS RELEASE

Halmstad 25 November, 2013

Hedging through leasing boosts earning

Agreements have been signed for the lease of the Fröslida and Gettnabo wind farms (34.5 MW) over a period of one year. As announced previously, leases have already been concluded for the Södra Kärra, Blekhem and Skäppentorp wind farms (24.5 MW). This means that 59 MW out of a total operational output of 253 MW has been leased out to other operators.

The lease of 59 MW of wind power output is expected to have a positive annual impact on earnings of around SEK 16 million compared with selling generated electricity and electricity certificates at the forward prices applying at the time when the contract was concluded.

The concept has been developed to keep revenues at a continued high level despite the current low prices of electricity and electricity certificates. Further wind farms may be leased out.

About Arise

Arise is one of Sweden's leading companies in onshore wind power. Its business concept is to sell electricity generated at the company's own wind turbines. The company's target is to have 1,000 MW of onshore wind power constructed and under management by 2017, of which 500 MW will remain in the ownership of the company. Arise is listed on NASDAQ OMX Stockholm.
